Zektor Announces Inclusion Into Major Controller Libraries

Zektor products reduce workload for A/V companies

Poway, CA – April 29, 2008 – Zektor proudly announces the inclusion of their passive and matrix switching products into the libraries of AMX, Control4 and Crestron.

“We have been working diligently with all controller companies to include our family of premium switch products”, states Jeff Haynes, VP Sales and Marketing at Zektor. “Zektor has a loyal following of professional installers across the U.S. that has long desired to be able to integrate our products with the most popular automation controls”.

“Our mission at Zektor has always been to be an easy company to do business with”, adds Jeff Hanson, President and co-founder. “With our protocol now available via these companies’ websites, it reduces the technical time for setup and installation for all of our customers”.

Zektor products are available through independent representatives, dealers, installers and internet retailers across the U.S. and Internationally.

About Zektor

Zektor is a designer and manufacturer of prosumer and professional passive, matrix and Pro A/V switches for the commercial and residential marketplace. Zektor proudly designs, manufactures and supports all of their products in the USA. Zektor was founded in 2003 and is a privately held company.
